Widget | Framework	**Functionality**	**Status ***	**Note**
About	Edit source code	Not planned	Use Embed widget
Attribute Table	Import multiple tables from a web map	Available	Online June 2024/Enterprise 11.3
	Field alias	Not planned	
	Related table	Available	Online June 2024/Enterprise 11.3
	Honor the number and date format configured in Map Viewer	Planned	
	Show attachments	Not planned	
Basemap Gallery	Create new basemaps	Not planned	
Bookmark	Allow to change bookmarks added at run time	Not planned	
Controller	Widget group	Planned	
Directions	Travel mode & traffic layer	Not planned	
	Route options	Not planned	
	Preset stops	Not planned	
	Barrier layers	Planned	
	Summary of time/distance for each leg of trip	Planned	
	Print the route	Planned	
	Return to start point	Not planned	
	Optimize the route order	Planned	
	Search fort Country code	Planned	
	Local search (with radius)	Planned	
	Search delay	Not planned	
	Search using minimum characters	Not planned	
Draw	Text symbol	Planned	
	Arrow symbol	Not planned	
	Snapping	Planned	
	Freehand drawing mode	Planned	
	Triangle & Ellipsis	Not planned	
	Add the drawing as an operational layer of the map	Planned	
Filter	Allow end users to creat custom filters	Planned	
	Enable turning off filters (except for custom filters)	Planned	
Geoprocessing	Feature input method - Service URL	Planned	
	Raster input method - File upload & Service URL	Planned	
	Table input method - JSON string	Not planned	
	GP Parameter - GPMultiValues	Planned	
	Change the display name for a tool	Not planned	
	The option of Do not send URL but FeatureCollections as input	Not planned	
	The option of not creating items in the content	Not planned	
	Predefined schema - renderer and pop-up	Available	Online June 2024/Enterprise 11.3
	Order result layers	Not planned	
	Feature selection	Available	Online June 2024/Enterprise 11.3
	The action of Set as input of Geoprocessing on selections	Available	Online June 2024/Enterprise 11.3
Infographic	Gauge	Available	Online June 2024/Enterprise 11.3
	Null value handling	Planned	
	Display range slider	Available	Online June 2024/Enterprise 11.3
	Use layer's symbology for chart color	Planned	
	Hide x/y axis	Planned	
	Expression – Indicator (dynamic style)	Not planned	
Info Summary	Support map symbols in Near Me widget panel	Available	
	Support cluster symbols	Planned	
	Display logo	Not planned	
Layer List	Show title	Not planned	Use Text widget
	Show Basemap	Not planned	
	Set visibility range	Planned	
	Enabe /Disable pop-ups	Planned	
Legend	Show legend for selected layers	Not planned	
Map	Custom visible scales	Planned	
Measurement	Add the measure graphic as an operational layer of the map	Planned	
	Add the measure graphic as an operational layer of the map	Planned	
	Meassurement tool - location	Not planned	Use Coordinates or Coordinate Conversion widgets
My Location	Tracking capabilities	Available	Online June 2024/Enterprise 11.4
Near Me	Direction	Available	Online June 2024/Enterprise 11.4
	Proximity search	Planned	
	Limit number of results	Not planned	
Scalebar	Style	Not planned	
	Unit settings	Planned	
Screening	Upload a shapefile to use as search area	Available	Use Add Data widget to upload Shapefile
	Reporting	Available	Use Enterprise 11.3 and up printing service
	Use coordinate geometry to create search area	Not planned	
	Allow users to upload shapefile to be used as analysis layer	Not planned	
	Not analyze results for layers that are not visible	Not planned	
Search	Only search in current map extent	Planned	
	Country or region code (ArcGIS World Geocoding Service)	Planned	
	Local search	Planned	
Situation Awareness	Batch export	Available	
	Reporting	Available	Use Enterprise 11.3 and up printing service
	Direction	Available	
	Save features	Planned	
	Snapshot	Available	Online June 2024/Enterprise 11.4 Batch export to item
	Horizontal orientation	Not Planned	
	Export only configured fields or analysis type fields	Available	Online June 2024/Enterprise 11.4
Swipe	Spy glass tool	Not planned	
Time Slider	Display layer names	Not planned	
	Date and time format	Planned	
App Framework	Scan QR code to launch app	Planned	
	Feature actions - Show related records, Create layer, Add a marker	Planned	Related records in Online June 2024/Enterprise 11.3
	URL parameters - Add a point, Query a feature, Level	Planned	
	URL parameters - Cross device break points	Not planned	
	Box Theme	Not planned	
	Tab Theme	Available	Online June 2024/Enterprise 11.3
	Group widgets	Planned	
	Arcade	Planned	
	App state	Available	Use Map URL parameters - Viewpoint and Layer visibility
	External data source - Statistics	Not planned	
Editing Capabilities	Edit, Smart Editor, and Batch Attributes Editor widgets		See the Editing Matrix

Version 2024-07-08

* Status based on availability in ArcGIS Online (latest version of Experience Builder).
