

Esri Electric @ IMGIS

Your personal Guide for the Electric Industry at IMGIS

We are excited to welcome you to the first Esri Infrastructure Management & GIS Conference! The IMGIS Conference is a one-time cross-over virtual event with integrated content, bringing together GIS professionals specializing in the management of infrastructure from across several interconnected industry segments - Electric, Gas & Pipeline, Telecom, Transportation, Water, and AEC. This conference will provide users from infrastructure sectors with a unique opportunity to learn and share within their collective community at the largest GIS infrastructure conference in the world.

To help direct you through the conference we created this simple guide to highlight focused sessions for the [Electric Industry](#), including user presentations, technical workshops with live Q&A sessions, industry presentations, and on-demand content. Click [here](#) to view the full agenda.

Get Familiar with the Virtual IMGIS Platform

The IMGIS Conference will be held virtually through an online platform. To familiarize yourself with this experience, be on the lookout for an email that will include an IMGIS Attendee Guide, tutorial video, and link to access the platform. Registered attendees can access the platform beginning Friday, October 23th.

Plenary, Executive Leadership Forum, Electric Industry Keynote and Electric Special Interest Group

Don't miss the Plenary, Executive Leadership Forum, Electric Industry Keynote and SIG session for thought-provoking powerful stories about how GIS is making a difference in the electric industry. See demonstrations of the latest technology and capabilities ArcGIS offers.

Virtually Network with Thousands of Your Peers

The world's largest GIS infrastructure conference offers you virtual networking and collaboration opportunities with peers. Find others who face similar challenges and have solved them using geospatial solutions. Make sure you access the platform early and set up your profile before the event begins to take full advantage of this capability.

*Times are listed in Pacific daylight time (PDT)
Please note: All listings subject to change.

Conference Expo

In the Expo, you can explore the latest Esri product solutions and get your questions answered by experts from industry, product, and software app teams. Visit the expo to:

- Ask a technical question
- Request a demo
- Talk to an account manager

You will also have the opportunity to interact virtually with our sponsors and exhibitors. See how they are impacting their industries, get your questions answered, and discover GIS-powered products and services.

For a full list of IMGIS conference sponsors and exhibitors, click [here](#).

A special **THANK YOU** to our Featured Electric Industry Sponsors. We encourage you to visit their websites before the conference, visit their listings during the event, network with their representatives, and search the agenda for their special presentations.

[Epoch Solutions](#) - IMGIS Silver Sponsor

EpochField is a powerful mobile workforce management solution that enables field users to access and view their organization's secured asset data. EpochField's synchronization capabilities allow offline network asset data to seamlessly integrate with the backend GIS system and provides a fully disconnected or connected map-centric solution. Simply said, when the field requires asset information, the data is readily available and does not depend on connectivity status – a key differentiator of EpochField.

[UDC](#) - IMGIS Silver Sponsor

Building Digital Twins for Utilities - Maximize reliability and efficiency with a real-time digital replica of your entire utility network. Benefit from UDC's Digital Twin solution, a detailed dashboard of actionable operational data built on the proven Esri ArcGIS platform. Do deep analysis on network performance, revealing improvement opportunities and cutting downtime through predictive maintenance. Dashboard views can be configured to support a variety of grid management activities including customer communications, emergency planning and preparedness, and future CapEx budgeting and planning. Talk with UDC during the IMGIS Conference about our Digital Utility Solutions or click our logo to learn more.
