Table of Contents

Esri resources for your organization

Course introduction

Course introduction
Course goals
Installing the course data
Icons used in this workbook
Understanding the ArcGIS platform

1 Rasters

Lesson introduction
What is remote sensing?
Rasters in ArcGIS Pro
Sensor resolutions
The electromagnetic spectrum
Band combinations: Applied
Exercise 1: Explore band combinations
- Create a course project
- Examine your raster
- View image information
- Modify band combinations
- Compare band combinations
- Display with indices

Lesson review
Answers to Lesson 1 questions

2 Raster functions

Lesson introduction
What are raster functions?
Benefits of raster functions
Consider raster function parameters
Types of raster functions
Exercise 2: Explore raster functions
- Examine a raster
- Apply the Greater Than function
- Apply the Slope function
- Apply the Aspect function

Lesson review

Answers to Lesson 2 questions

3 Raster function templates

Lesson introduction
What are raster function templates?
Raster function template components
Evaluate a raster function template
Exercise 3: Create a raster function template
- Create the raster function template
- Build the function chain: Elevation range
- Build the function chain: Slope range
- Build the function chain: Aspect range
- Combine all the functions
- Save the raster function template
- Apply the function template
- Modify the raster function template
- Apply the raster function template

Benefits of using raster function templates
Raster functions used in raster products
Lesson review
Answers to Lesson 3 questions

4 Change detection with raster functions

Lesson introduction
Change detection types
Choosing types of change detection
Magnitude change detection workflow
Preprocessing methods for change detection
Exercise 4: Measure change detection with raster functions
- Evaluate rasters
- Preprocess input rasters
- Use an index on an input raster
- Calculate change
- Identify meaningful change
- Create an analysis product

Lesson review
Answers to Lesson 4 questions

5 Image classification techniques

Lesson introduction
Defining image classification

Describing image classification outputs
Image classification types
Image classification methods
Choosing image classification techniques
Lesson review
Answers to Lesson 5 questions

6 Classification workflows

Lesson introduction
Unsupervised image classification workflow
Exercise 6: Use the unsupervised image classification workflow
- Add input data
- Prepare the surface model data
- Prepare the multispectral raster
- Train the image classifier
- Classify the raster
- Create the initial analysis product
- Evaluate in 3D
- Challenge: Survey the tree canopy

Supervised classification workflow
Classifying a raster with the Image Classification Wizard
Lesson review
Answers to Lesson 6 questions
Exercise 6 challenge solution

7 Segmentation

Lesson introduction
What is segmentation?
Segmentation parameters
Segmentation parameter exploration
Exercise 7: Create a segmented raster
- Add the input raster
- Create initial segmentation
- Improve segmentation results
- Create the segmented raster

Lesson review

8 Training the classifier

Lesson introduction
Training sample considerations

Exercise 8A: Create training samples
Add input data
Evaluate the study area
Configure the Training Samples Manager
Collect training samples
Save training samples
Types of image classification algorithms
Exercise 8B: Create a classified thematic raster
Create a classifier definition
Create a classified thematic raster
Extract a target class
Challenge: Calculate the percent per parcel
Lesson review
Answers to Lesson 8 questions
Exercise 8B challenge solution

9 Classification evaluation

Lesson introduction
Pixel Editor functionality
Pixel Editor operations
Post-processing classification results
Accuracy assessment workflow
Accuracy assessment statistics
Exercise 9: Create an accuracy assessment of classified results
Evaluate input layers
Reclassify pixels
Add accuracy assessment points
Complete the confusion matrix
Lesson review
Answers to Lesson 9 questions

Appendices

Appendix A: Esri data license agreement
Appendix B: Answers to lesson review questions
Appendix C: Additional resources
