

Questions

1. Do you require [Web Tier Authentication](#)?

2. a) Do you want to block the ArcGIS Server Administrator Directory and ArcGIS Server Manager from the view of external users?

OR

2. b) Do you want users to NOT see the default port 6080 or the default site name arcgis?

3. Do you have a proxy server?

4. Do you have a GIS server site with [multiple machine configuration](#)?

5. Do you have a network load balancer (NLB)*?

***Note:** Although the GIS servers perform some degree of request distribution among themselves, the Web Adaptor detects the GIS servers that participate in the site and forwards requests to each in a round-robin fashion.
