

# Design a Geodatabase

Srinivas Suryanarayanaiah

UC

esri

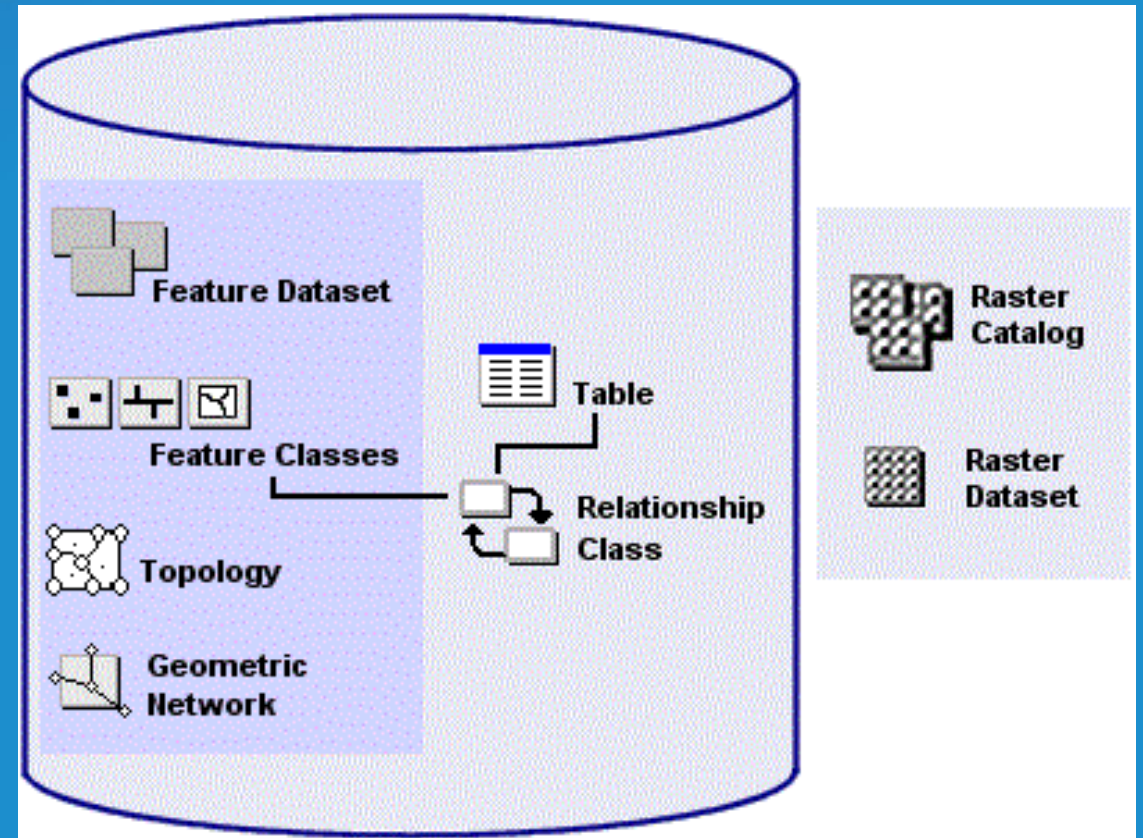

# Presentation Overview

## Geodatabase Design Process

- **Data requirements gathering**
  - Understanding your Organization
  - How to gather requirements
- **Geodatabase design**
  - Leverage existing models
  - Design tools
  - Testing and refining
  - Documentation

# Fundamentals of Geodatabase Design

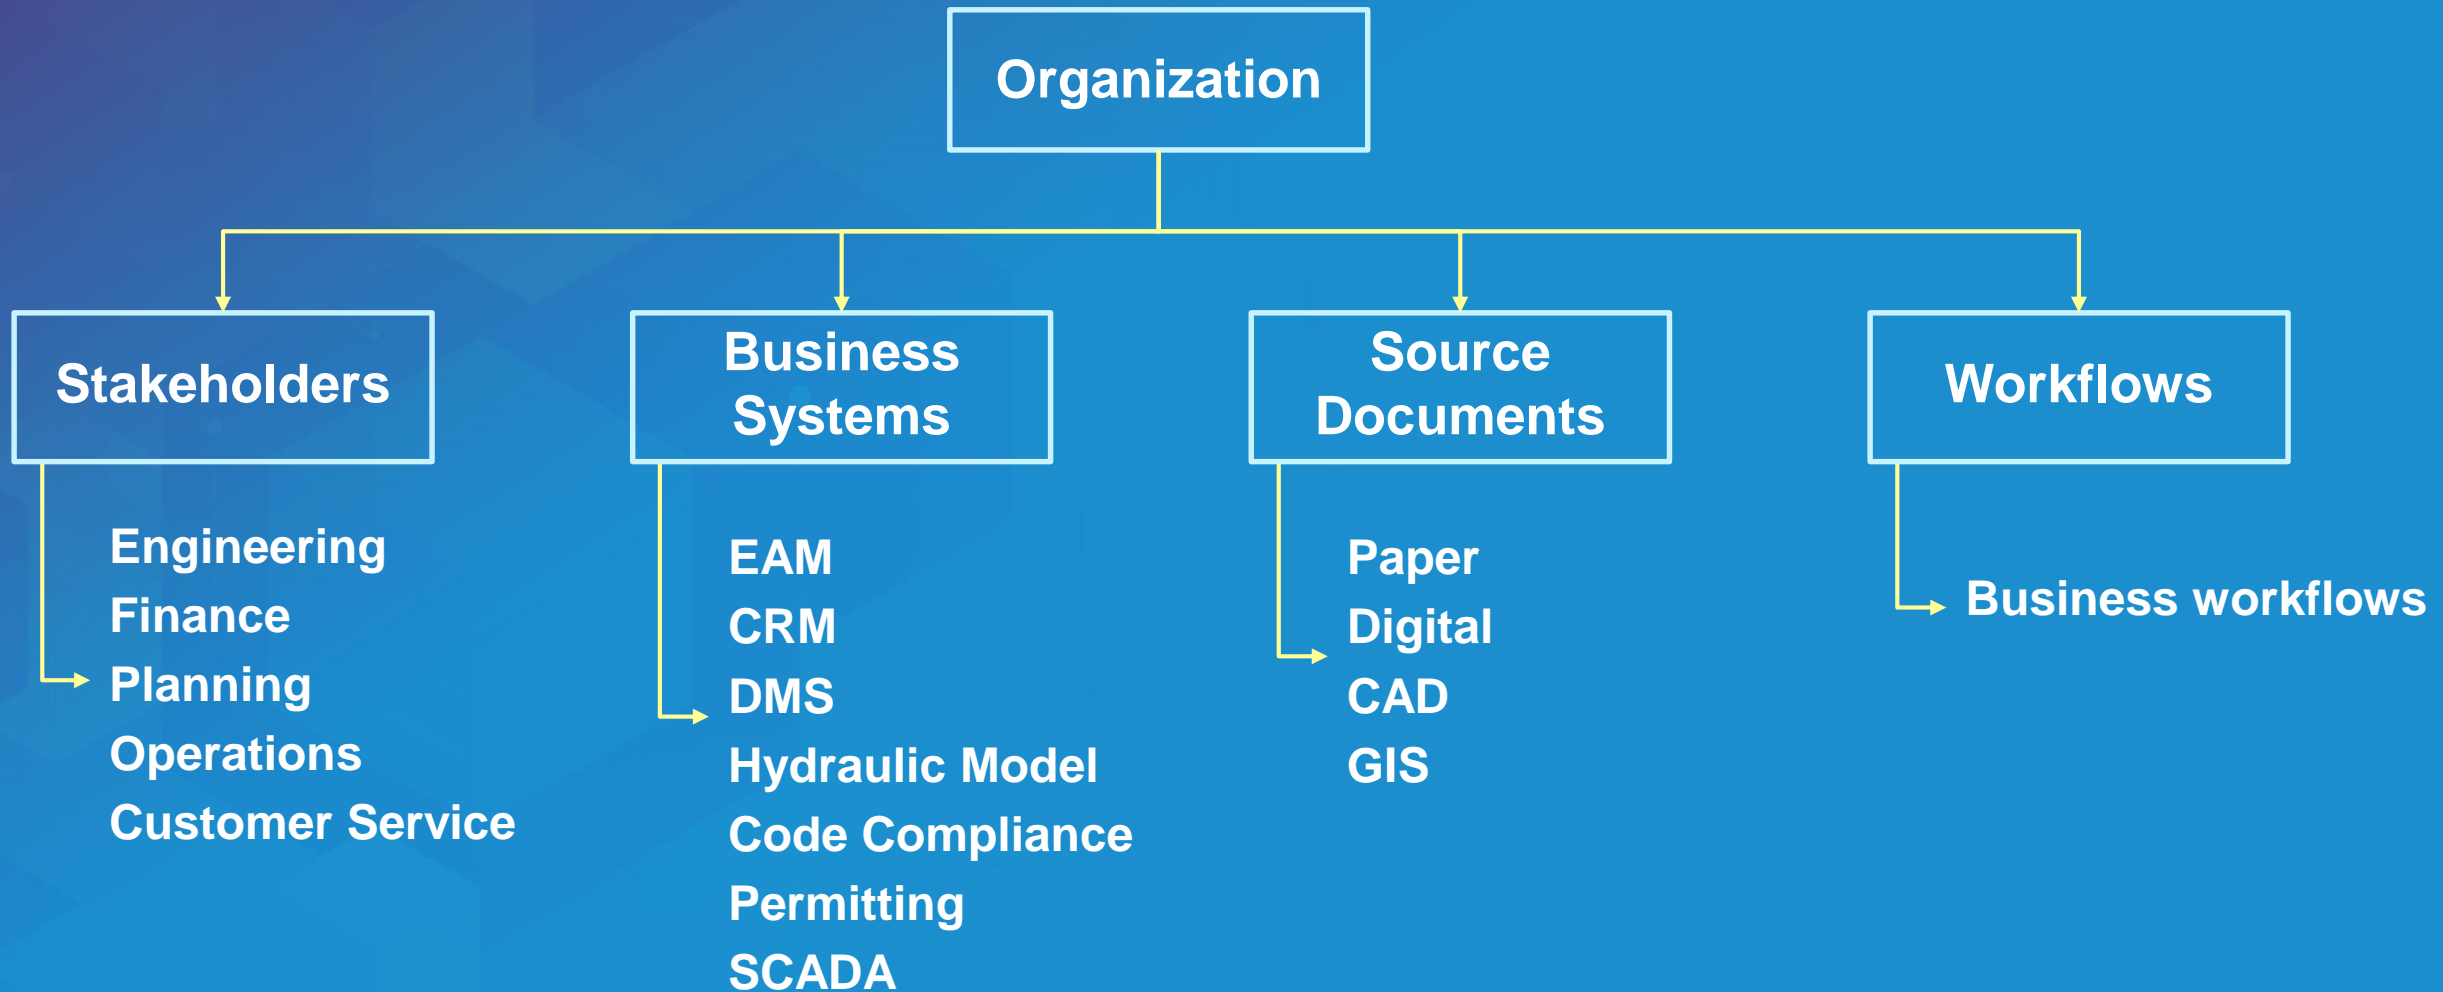

- Organizing geographic features
  - Line
  - Polygon
  - Point
  - Raster
- 3 flavors
  - Personal, File and Enterprise
- Feature datasets
- Feature classes
- Attributes, domains
- Topologies, Networks
- Tables
- Relationship classes

# Geodatabase Design Approaches

- **Address specific need**
  - Single user or a small group
  - No integration with other groups or business systems
- **Enterprise-wide**
  - Larger group or groups
  - Integration with other groups or business systems

# Data Requirements Gathering

# Data Requirements Gathering

- **How?**

- Interviews
- Workshops
- Survey

## Definition of GIS Needs

---

1. What are the objectives of the GIS?
2. What is the reason for developing or expanding the GIS?
3. What do you expect accomplish with the GIS?
4. How will the GIS make your work easier?
5. Which departments and divisions want to acquire GIS or add to their GIS capabilities?
6. What does each department and division expect to gain from the use of GIS?
7. Will different departments develop and maintain different parts of the GIS?
8. What are the most important features or functions of a GIS?
9. Who will use the GIS?
  - What is their function?
  - How many users will use the GIS now and in the future?
  - How many locations?
11. Data source
12. Data format
13. Method or procedure for accessing the data
14. Data access restrictions and security requirements

# Design Process

- Leverage existing models

- ArcGIS Solutions <http://solutions.arcgis.com/>

- Local Government
- State Government
- Emergency Management
- Water
- Electric
- Gas
- Defense
- Telecommunications
- Parks & Gardens

- Address
- AdministrativeArea
- AssessmentInformation
- CadastralReference
- CapitalPlanning
- CitizenService
- Demography
- ElectionAdministration
- Elevation
- EmergencyOperations
- ExecutiveReporting
- FacilitiesStreets
- FireServiceOperations
- InfrastructureOperations
- LandUseOperations
- LandUsePlanning
- LawEnforcementOperations
- ParcelEditing
- ParcelPublishing
- PublicSafetyPlanning
- ReferenceData
- SewerStormwater
- Stormwater
- Telemetry
- WaterDistribution

# Design Process

- **Leverage existing models**

- **Esri data models <http://support.esri.com/technical-article/000011644>**
  - **Agriculture**
  - **Carbon Footprint**
  - **Forest Service**
  - **Groundwater**
  - **Health**
  - **Irrigation**

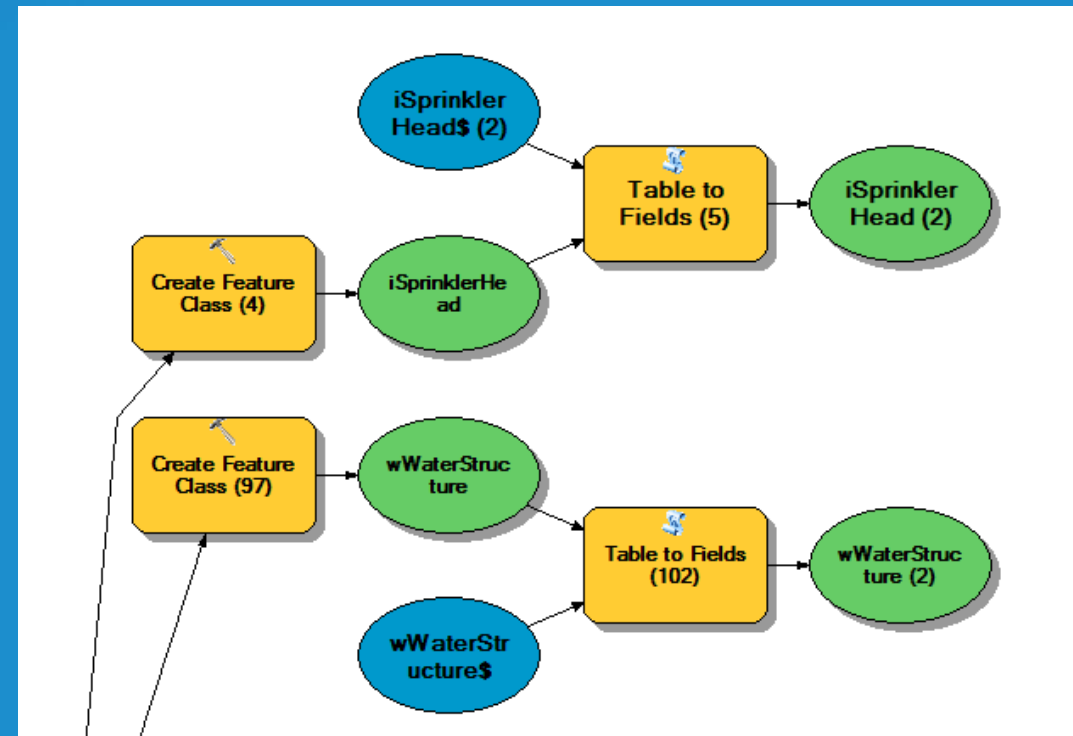

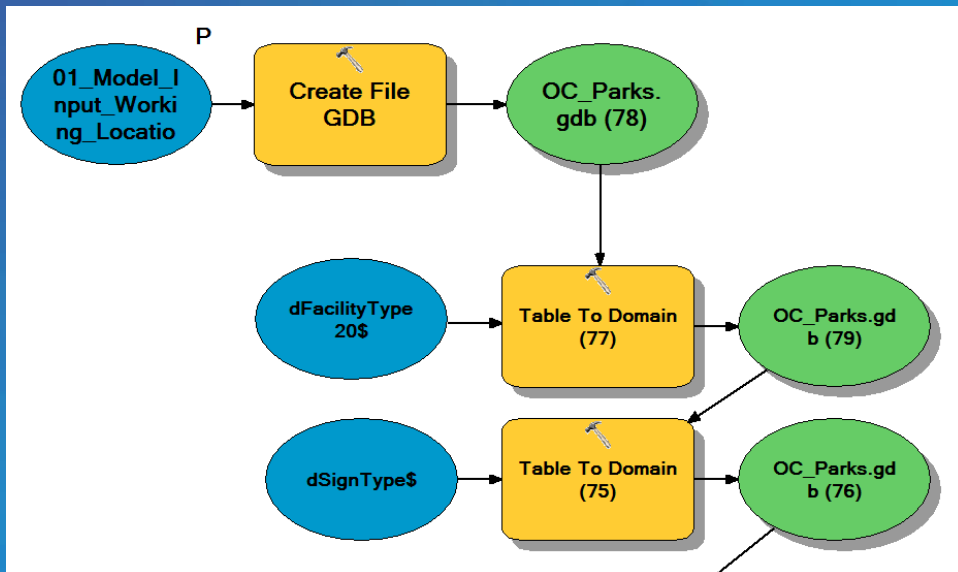

# Design Process

- **Extend existing models**
  - **Review and modify models**
    - **Feature classes**
    - **Fields**
    - **Domains**

# Design Tools

- Geoprocessing Models

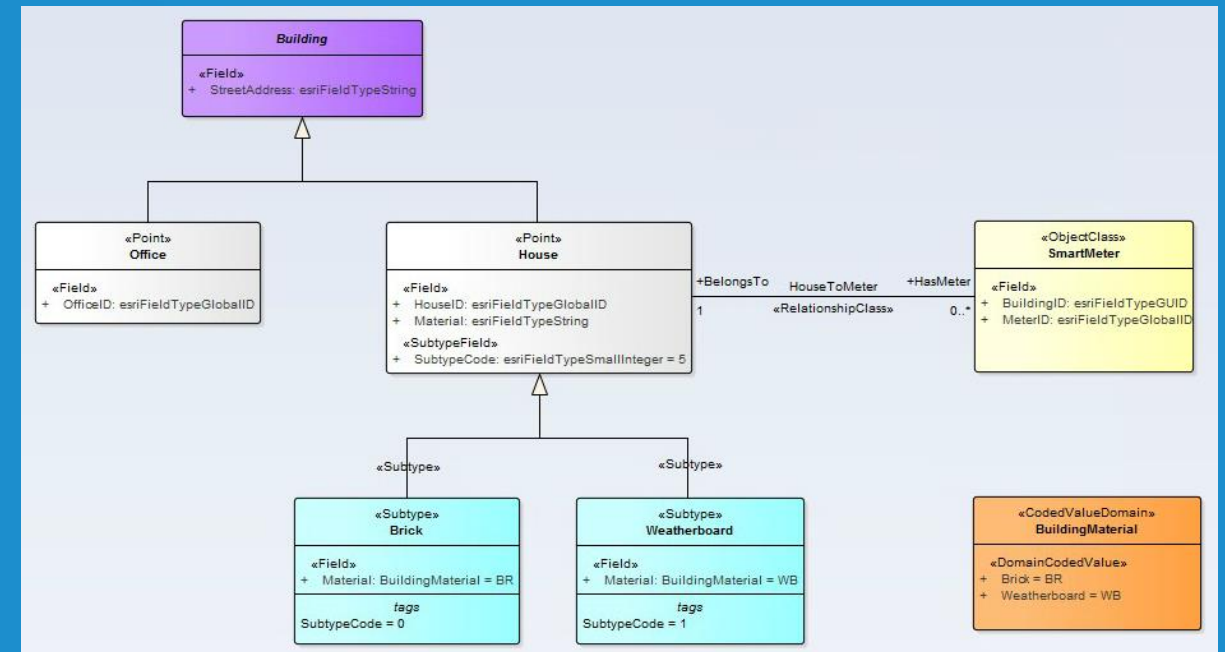

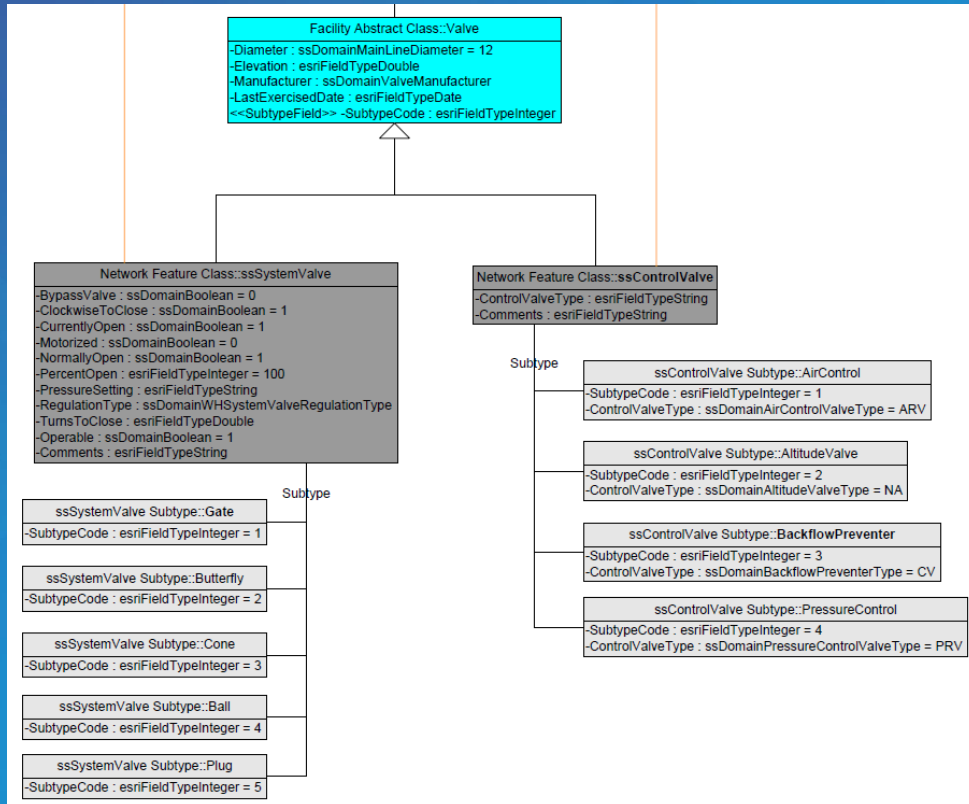

# Design Tools

- Geodatabase X-Ray

	A	B	C	D	E	F	G	H	I	J	K	L
1	<b>FeatureClassName</b>	FireStations										
2	<b>DatasetType</b>	FeatureClass										
3	<b>Description</b>	REQUIRED: A brief narrative summary of the data set.										
4	<b>FeatureDataset</b>	Landbase										
5	<b>Tags</b>	REQUIRED: Common-use word or phrase used to describe the subject of the data set.										
6	<b>ShapeType</b>	Point										
7	<b>FeatureType</b>	Simple										
8	<b>AliasName</b>	FireStations										
9	<b>HasM</b>	false										
10	<b>HasZ</b>	false										
11	<b>SubtypeFieldName</b>	null										
12	<b>DefaultSubtype</b>	null										
13	<b>DSID</b>	10

27	ARC_State	String	4	ARC_State	State Abbreviation	null	null	true	0	0	null	null
28	ARC_Zip	String	20	ARC_Zip	Zip	null	null	true	0	0	null	null
29	Station_Id	Integer	4	Station_Id	Station_Id	null	null	true	0	0	null	null
30	Address	String	50	Address	Address	null	null	true	0	0	null	null
31	City	String	50	City	City	null	null	true	0	0	null	null
32	State	String	2	State	State	null	null	true	0	0	null	null

# Design Tools

- Unified Modeling Language (UML)

# Design Process

- **Testing and Refining**
  - **Perform a pilot data conversion or migration**
  - **Configure applications**
  - **Test functionality and performance**
  - **Refine**

# Design Process

- Documentation

**Geodatabase Documentation**

---

**Date:** Friday, January 04, 2013  
**Time:** 1:00:43 PM

---

**Summary Information and Links**

[3 Feature Datasets and 47 Feature Classes](#)  
No Topology Datasets  
[1 Geometric Networks contained within Feature Datasets](#)  
No Rasters  
No Tables (Object Classes)  
[1 Relationship Class](#)  
[36 Domains](#)

---

**Feature Datasets and Child Classes**

[ReferenceData - Feature Dataset](#)

---

[Water\\_Distribution - Feature Dataset](#)

[MapUpdatePolygon - Simple](#)  
[OffsetDistance - Dimension](#)  
[wAbandonedCasing - Simple](#)  
[wAbandonedControlValve - Simple](#)  
[wAbandonedGravityMain - Simple](#)  
[wAbandonedHydrant - Simple](#)  
[wAbandonedLaterallLine - Simple](#)  
[wAbandonedPressurizedMain - Simple](#)  
[wAbandonedSystemValve - Simple](#)  
[wAccessManhole - Simple](#)  
[Water\\_Distribution\\_Net\\_Junctions - SimpleJunction](#)  
[wBlowoff - SimpleJunction](#)

SymbolRotation	Double	SymbolRotation
PlotMap	SmallInteger	PlotMap
RouteGroup	String	RouteGroup
Comments	String	Comments
OID_REF	String	OID_REF

# Design Process

- **Key Takeaways**

- **Think through the goals and output information products**
- **Collaborate**
- **Consider existing designs**

**Requirements > Design > Database > Information Products/Applications**
