

Esri Service Packages

High-Impact, Cost-Effective Consulting Services

Esri® Service Packages are short-term, high-impact services, delivered by Esri professionals, that provide knowledge transfer, best practices, and consulting support on a variety of Esri products and GIS management tasks.

Service packages help you

- Implement Esri technology faster.
- Increase productivity and operational effectiveness.

What are Esri Service Packages?

Service Packages are standardized service offerings with a defined scope and fixed price. They are available to US customers and partners. The following types of Service Packages are offered:

- **Jumpstart:** Designed to help you quickly become self-sufficient in installing, implementing, and managing Esri software, Jumpstart Services Packages typically provide technical knowledge transfer and best practices for the use of the ArcGIS Platform.
- **Launch Kit:** Collaborative engagements to empower you with the knowledge and workflows to manage your organizational account, build high quality content and create focused maps and apps.
- **Enterprise Consulting:** Get specific assistance in key areas such as enterprise GIS architecture design and GIS for land records or facilities.
- **Workshop:** Interactive, hands-on technology transfer helps you become self-sufficient in using Esri technology. Workshop-based Service Packages cover specific Esri technology and GIS- or industry-related activities.

See the back page for a list of available packages.

"I am grateful to Esri for validating my faith in the people and solutions that make your organization the world leader in GIS. As I sit here, we are far ahead of where I thought we would be this evening—even with what I would have considered a successful jump start experience. So there's nothing but positives in this feedback."

There is no doubt that the deliberate approach that was taken to this program prior to the team's visit played a huge role in our success."

Eric Schmidt, MA, GISP, GIS-S
GIS Supervisor
Douglas County, NV
