

The background features a dark blue gradient with various colorful geometric shapes, including rectangles and lines in shades of red, orange, yellow, and cyan. Some shapes have a textured, grid-like appearance. A white rectangular box is positioned in the upper left corner.

Collector and Workforce Update

Jeff Shaner

Collector for ArcGIS

Map centric data collection

Web Maps

Works offline

High accuracy GPS

Collector Current Status

- Current Release **v18.0.1**
- Recent release highlights
 - Support for **Leica GG04 Plus** (Bluetooth receiver)
 - Security updates and bug fixes
- Some Additional Recent Feature Adds/Valuable Stuff
 - URL scheme updates
 - Trimble Catalyst Receiver
 - Renaming photos
 - SD card support for basemaps (Android)

Conditional Logic, Grouping *

High Accuracy Improvements

Z value support
Grid-based and custom transformations
Vertical Transformations*

Demo

Collector Aurora Project

Current Status

- **Open beta** on the iOS platform
- Planned **July beta** on Android platform

Release Plans

- **Q3** for iOS
- **Q4** for Android
- Windows TBD

Release Strategy

- Collector store update from “Collector for ArcGIS” to “Collector Classic”
- New store listing for “Collector”

Workforce for ArcGIS

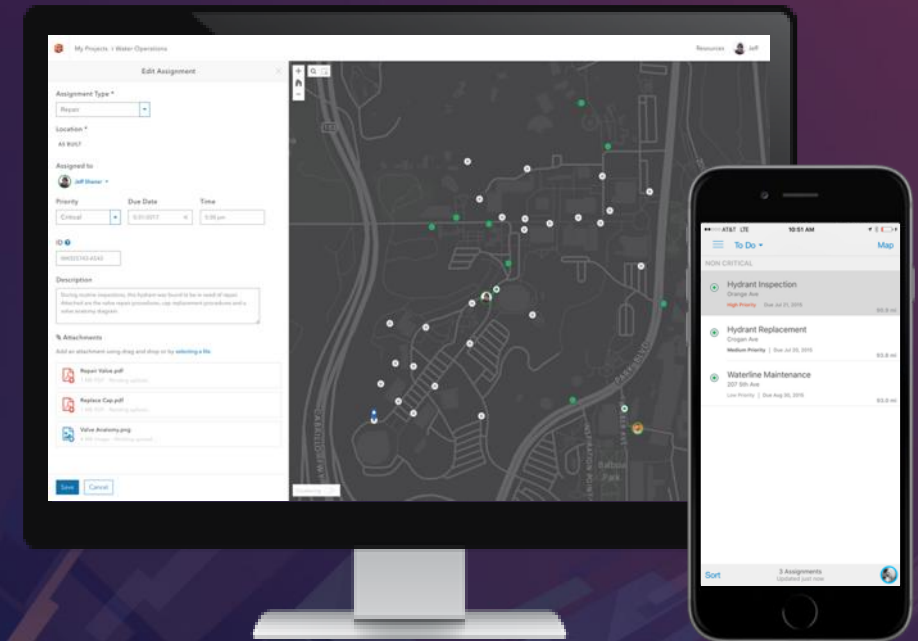

Coordinate field work

Plan, coordinate field work

Location Awareness

Create & Manage field assignments

What's Coming Next

- **Q3**

- Occasionally Connected Support
- Add ability for mobile workers to pick up unassigned work
- Usability improvements to the Workforce web app and mobile apps

What Is Location Tracking in ArcGIS

- **Organizational Capability**

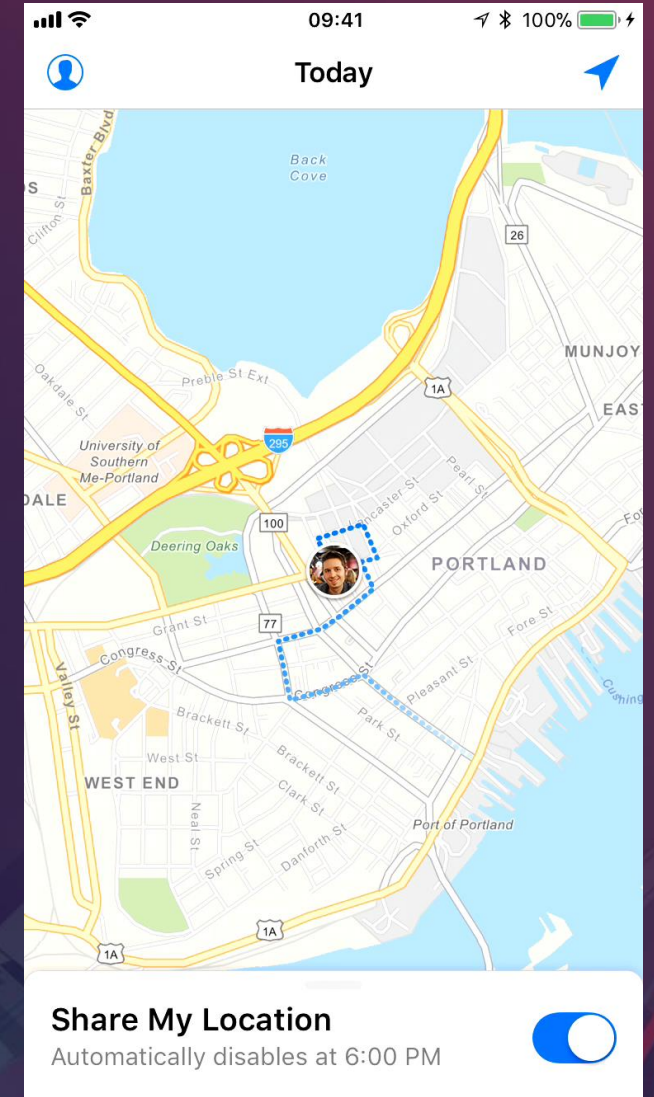

- Administrators can enable location tracking in their organization
- Will create a single service for storing and managing location tracks in a spatiotemporal big data store
- Will create secure views of location tracks

- **Mobile app**

- Simple, Schedule-driven tracking experience
- Supports occasionally connected workflows
- Tracks in background and when app is not running
- Any level or named user role can contribute

- **Web app**

- Display and manage users and their location history

Plan

- Private, Closed Beta available NOW!
- Support both ArcGIS Online and ArcGIS Enterprise
- Mobile app for iOS and Android platforms
- Release with ArcGIS Enterprise 10.7 and ArcGIS Online 6.3 (end of 2018)
