Capabilities currently under development

- **Multi-field (concatenated) Route ID support in ArcGIS Pro**
    - Edit activities UI
- **Conflict Prevention migration to ArcGIS Pro**
    - Locks table
   - Cartographic Realignment

Support Incidents/Defects

- **BUG-000115036 - Line events created on a redline in Event Editor get "Route measures are null" after creating the route and applying updates in ArcMap (developer fixing)**

- **BUG-000115339 - Make Feature Layer on a layer that participates in the ALRS ignores the SQL Expression set in the script (fixed)**

- **BUG-000116475 - From Measure when creating linear events with Stationing method doesn't change location after changing station location on second linear event created (developer investigating)**

- **BUG-000116664 In Roadway Characteristics Editor 10.6.1, selecting events by the route highlights the route, resulting in indistinguishable linear event features (developer investigating)**

- **BUG-000117296 Conflicts are introduced on routes when doing calibration point edits while the route edits are being posted in another version (developer investigating)**

- **BUG-000117260 For the first edit each day, Event Editor assigns the lock to ::AnonymousWebUser if Portal for ArcGIS is set up with enterprise logins (developer investigating)**

Documentation Updates/Training Opportunities

Documentation

- **Roads and Highways online help update scheduled for October/November**
  - Includes redirects fixes for topics in 10.4 and earlier desktop that moved to enterprise help
