Distributed GIS - Establishing a Trusted Collaboration

Nate Bennett
Jay Rajamohan
Best Practice: Distributed GIS

An integrated set of geographic information systems working together as part of a trusted collaboration

- Model after the organization
- Preserves departmental control
- Supports enterprise needs

Preserve control and access within individual departments while supporting the broader needs of the enterprise.

Distributed GIS is a modern approach that supports a new type of sharing.
Distributed GIS | Distributed Collaboration

A trusted network of Web GIS systems

.. integrated set of deployments working towards shared goals
New, simpler way to share and collaborate!

.. integrated set of deployments working towards shared goals
Is it for me?

.. integrated set of deployments working towards shared goals
Best Practice: Distributed GIS

An integrated set of geographic information systems working together as part of a trusted collaboration

- Model after the organization
