

Web AppBuilder		Experience Builder	
Widget Framework	Functionality	Status *	Note
About	Edit source code	Not planned	Use Embed widget
Attribute Table	Import multiple tables from a web map	Planned	
	Field alias	Not planned	
	Related table	Planned	
Basemap Gallery	Show attachments	Not planned	
	Create new basemaps	Not planned	
Bookmark	Allow to change bookmarks added at run time	Not planned	
Controller	Widget group	Planned	
Directions	Travel mode & traffic layer	Not planned	
	Route options	Not planned	
	Preset stops	Not planned	
	Barrier layers	Planned	
	Search fort Country code	Planned	
	Local search (with radius)	Planned	
	Search delay	Not planned	
Draw	Search using minimum characters	Not planned	
	Text symbol	Planned	
	Arrow symbol	Not planned	
	Snapping	Planned	
	Freehand drawing mode	Planned	
	Triangle & Ellipsis	Not planned	
Filter	Add the drawing as an operational layer of the map	Planned	
	Allow end users to creat custom filters	Planned	
Geoprocessing	Enable turning off filters (except for custom filters)	Planned	
	Feature input method - Service URL	Planned	
	Raster input method - File upload & Service URL	Planned	
	Table input method - JSON string	Not planned	
	GP Parameter - GPMultiValues	Planned	
	Change the display name for a tool	Not planned	
	The option of Do not send URL but FeatureCollections as input	Not planned	
	The option of not creating items in the content	Not planned	
	Predefined schema - renderer and pop-up	Not planned	
	Order result layers	Not planned	
Infographic	Feature selection	Not planned	
	The action of Set as input of Geoprocessing on selections	Planned	
	Gauge	Planned	
	Null value handling	Planned	
	Display range slider	Planned	
	Use layer's symbology for chart color	Planned	
Info Summary	Hide x/y axis	Not planned	
	Expression – Indicator (dynamic style)	Not planned	
	Support map symbols in Near Me widget panel	Planned	
Layer List	Support cluster symbols	Planned	
	Display logo	Not planned	
Legend	Show title	Not planned	Use Text widget
	Show Basemap	Not planned	
	Set visibility range	Planned	
Map	Enabe /Disable pop-ups	Planned	
	Show legend for selected layers	Not planned	
Measurement	Custom visible scales	Planned	
	Add the measure graphic as an operational layer of the map	Planned	New Measure widget
	Add the measure graphic as an operational layer of the map	Planned	New Measure widget
My Location	Meassurement tool - location	Not planned	Use Coordinate widget
	Tracking capabilities will be in the new Tracking widget	Planned	New Tracking widget
Near Me	Direction	Planned	
	Proximity search	Not planned	
	Limit number of results	Not planned	
Scalebar	Style	Not planned	
	Unit settings	Planned	
Screening	Upload a shapefile to use as search area	Planned	
	Reporting	Planned	
	Use coordinate geometry to create search area	Not planned	
	Allow users to upload shapefile to be used as analysis layer	Not planned	
	Not analyze results for layers that are not visible	Not planned	
Search	Only search in current map extent	Planned	
	Country or region code (ArcGIS World Geocoding Service)	Planned	
	Local search	Planned	
Situation Awareness	Batch export	Planned	
	Reporting	Planned	
	Direction	Planned	
	Save features	Planned	
	Snapshot	Planned	
	Horizontal orientation	Planned	
	Export only configured fields or analysis type fields	Not planned	
Swipe	Spy glass tool	Not planned	
Time Slider	Display layer names	Not planned	
	Date and time format	Planned	In the general settings
App Framework	Scan QR code to launch app	Planned	
	Featue actions - Show related records, Create layer, Add a marker	Planned	
	URL parameters - Add a point, Query a feature, Level	Planned	
	URL parameters - Cross device break points	Not planned	
	Box Theme	Not planned	
	Tab Theme	Planned	
	Group widgets	Planned	
	Arcade	Planned	
App state	Planned	Use Map URL parameters - Viewpoint and Layer visibility	
Editing Capabilities	External data source - Statistics	Not planned	
	Edit, Smart Editor, and Batch Attributes Editor widgets		See the Editing Matrix
