

## Web AppBuilder for ArcGIS Developer Edition v2.9 – List of Issues Addressed

---

- ENH-000111723 Allow Users to Select which output the Geoprocessing widget in ModelBuilder should zoom to when there are multiple outputs.
- ENH-000111047 Allow the application creator to specify a default sort field in the attribute table widget configuration
- ENH-000110454 Allow user to change basemap when configuring Grid Overlay widget
- ENH-000109480 Provide a functionality to allow filtering multiple values in a single field that may contain delimited text or multiple binary fields in a single expression in a filter widget
- ENH-000106803 When using Measure Widget in Web AppBuilder, Provide the ability to keep the graphics when using Measure tool for proof/documentation of what was measured.
- ENH-000107351 Check box (Toolbar option) for delete in Edit widget in Web AppBuilder
- ENH-000102309 Add Live Data options to Web AppBuilder Time Slider widget
- ENH-000103713 Add the functionality to expand grouped layers by default with the Layer List Widget in Web App builder
- ENH-000103824 Provide a functionality to be able to query or filter multiple values for a field using a single expression for the query and filter widget in the web app builder application
- ENH-000100102 When using the Edit widget in a Web AppBuilder application, the create feature template window should not be shown if creating new features is not allowed for a particular layer.
- ENH-000099082 Allow the Time Slider widget to update start-time and end-time based on user's current local time.
- ENH-000096356 In Web AppBuilder for Developers 2.0, if the user runs the draw widget, allow the layer list to populate with the results only when a feature is drawn.
- ENH-000085096 Legend: Please improve the out-of-box Legend Widget to allow it to show symbology of basemap layers and have option to turn off labels and symbols for layers in the map if user doesn't want them to show.
- BUG-000114776 Uploading application zip file fails intermittently on Web AppBuilder (Developer Edition) with error: "Error parsing server result".
- BUG-000114963 Unzip command unzips all the folders as root folder in CentOS 4
- BUG-000113146 There are issues in displaying the Infographic widget in Web AppBuilder for ArcGIS (Developer Edition) 2.7.
- BUG-000113644 Initial edit fails on a feature with "Edit" widget
- BUG-000114591 Unable to search location in the Screening widget if the Edit widget is included in the ArcGIS Online Web AppBuilder app.
- BUG-000114642 ArcGIS Online Web AppBuilder Screening Widget report shows the attributes value as "No Data" instead of "0".
- BUG-000114536 Data Aggregation (Beta) Widget does not show XY coordinates in text box after moving feature on the map when feature is located by XY fields.

- BUG-000111208 The Infographic widget displays incorrect labels,when configured with Excel data (.xls format).
- BUG-000113746 Console error, "TypeError: Cannot read property 'show' of undefined" on clicking on Edit for a feature from the pop-up in Web Appbuilder application.
- BUG-000113540 The "IS NOT" condition in Filter Widget, when used as an expression, does not honor the String data type.
- BUG-000113192 The Smart Editor widget does not fully honor symbology configured with Arcade expressions.
- BUG-000109550 Near me widget in Web AppBuilder doesn't show middle value when moving the buffer.
- BUG-000110601 Download File Geodatabase is not enabled in the Screening widget after enabling Sync on the hosted feature service, if the service did not have Sync enabled in the first place when the service is added to the Screening widget.
- BUG-000111431 Applying a Filter Expression in the 'Near Me' Widget of Web App Builder is irreversible & the Filter menu is inaccessible if the number of records returned from the 'Near Me' query is one
- BUG-000111418 Web AppBuilder's Public Notification widget is not able to find an otherwise successful singleLine match with a custom geocode service.
- BUG-000110756 The Web AppBuilder for ArcGIS application freezes when adding the 'Near Me' widget if the services have empty groups.
- BUG-000110650 The Group layer does not expand (stays inactive) after a Web Map Service (WMS) layer is added to the map by using the Add Data widget in Web AppBuilder for ArcGIS.
- BUG-000109379 Exporting a CSV from the Attribute Table widget of the Web AppBuilder for ArcGIS with HTML rich text format does not preserve the rich text fonts and replaces them with HTML tags.
- BUG-000103872 The Info Summary widget in Web AppBuilder for ArcGIS does not reflect changes in the web map applied by the Filter widget when using ArcGIS Server web services.
- BUG-000096395 search: In the Search widget of Web AppBuilder for ArcGIS, setting the scale parameter is not honored in the resulting search extent.
- BUG-000082830 LayerList & Legend: After adding layer to web map from .csv, legend in Web App Builder labels each layer by the name of the .csv file instead of the name of the layer
