

Esri *Federal GIS* Conference

February 22–24, 2021 | Join us virtually

The Esri Federal GIS (FedGIS) Conference is the largest annual meeting of federal government GIS community members. We hope you'll join us again to learn about innovative strategies and tools that will help maximize your agency's geographic information system (GIS) platform capabilities.

Now, more than ever, we know how powerful GIS can be to interconnect national government agencies. Geospatial technology provides practical solutions to make a positive impact and difference nationally and globally. At the 2021 Esri FedGIS Conference, get inspired, connect and engage with leaders and peers, and learn about innovative solutions that can help you continue to make smarter, data-driven decisions.

Hear the latest GIS success stories from agencies leading the way to digital transformation. At the Plenary Session, Esri president Jack Dangermond will share valuable insights into emerging GIS technologies shaping the future of government.

Attend the all-new virtual Expo to connect with national government industry peers. Discover how our partners are successfully using GIS. Learn how to bring cutting-edge GIS tools back to your organization.

At the 2021 conference, you can engage in a range of learning opportunities, including technical workshops, special interest group meetings, and breakout sessions.

Registration is complimentary for federal employees and nongovernmental organization (NGO) personnel.

Sign up today to reserve your spot.
